

Museum of London saves £210,000 on staffing since 2007 with Advanced

The Musuem of London decided to move away from a third party controlled legacy system for financial management, and this led us to adopt Exchequer from Advanced as our accounting solution. In keeping with our goals, it was important to have a focused solution in place that offered cost-effective streamlining of all financial processes.

The need for effective reporting capabilities and a way to reduce customer debts were significant requirements in ourdecision making process.

When looking to control all aspects of the financial workflow internally, we knew weneeded to reduce time spent on manual processing whilst improving the quality and efficiency of reporting procedures.

Besim Mani, Finance Systems Manager, Museum of London, describes how clarity of information and sophisticated business tools from Exchequer offer the control he and his team need to manage funds.

"We frequently have to produce reports for stakeholders, auditors and the management committee – often two to three times a day," comments Besim. "Exchequer integrates seamlessly with Excel, providing us with easy reporting and hands-on information at all times. Reports can be customised according to the information requirements of the end recipient. I have to say that these capabilities not only help the finance department, but the organisation as a whole."

One particular area that the we were struggling with was management of customer debt. The nature of oure previous system meant that we had to pass requests for purchase orders, invoices and related documents to its external accountants, resulting in time delays and inaccuracies. By harnessing the power of Exchequer to automate and simplify routine business processes Besim and his team can control business efficiency.

Besim continues, "In the past it was difficult to handle customer debt, especially with very little visibility of the overall picture. There was often £30-40,000 of debt we couldn't effectively chase, as the tools and information just weren't available to us. Now the ledger can filter outstanding transactions, even historically, which allows us to reduce debts owed and gain tighter control. Any quotes, invoices, credit notes and so on can be raised in seconds and data only needs to be entered once.

Streamlining financial processes.

"From the moment we started to use Exchequer, we had total clarity of the business from a financial perspective something that is vital for charities."

Besim Mani > Finance Systems Manager > Museum of London

75% paperless in finance department.

We previously had two people handling purchase ledgers and now we only have one, despite us being a growing charitable organisation."

As a publicly funded establishment, we have to produce a high number of reports relating to expenditure. Industry regulators, supporters and donors expect in depth financial details that can be used to support budgeting, forecasting, cash flow analysis, consolidations and financial modelling. This can result in our staff spending a great deal of time customising reports and analysing data.

"My team now has instant access to documents and reports from Exchequer," says Besim. "It is easy to design reports and forms to suit our needs. We can easily distinguish figures such as income by donation, sponsorship, events etc. I have full visibility on exactly what is happening financially, which helps me to analyse this information and communicate it effectively. What's more I can close year-end easily without it being a time consuming and stressful process!"

We have been scanning all invoices for four years and the finance department is 75% paperless. This not only reduces storage space for archived documentation, but also ensures everything is securely backed up yet available at the touch of a button. Our entire organisation will be rolling out a document manager system that integrates fully with Exchequer and will facilitate a paperless and more efficient environment for every user. Besim says, "We see Exchequer as a solution that will grow and evolve with us and we are already looking at other modules that will further enhance our business productivity. Implementing Exchequer has changed the role of the finance team, as we can now spend more time on the higher-level aspects of our role rather than data entry and chasing invoices! From the moment we started to use Exchequer, we had total clarity of the business from a financial perspective – something that is vital for a charity".

Key benefits:

- Powerful management reporting and drilldown capabilities.
- > Time saving automation.
- > Rapid access to key financials.
- Flexible cashbook reconciliations for all accounts.

"My team now has instant access to documents and reports from Exchequer."
